TECHNICAL DATA SHEET

RIGGER Boot ESD S3 CI No. 78671

Sz. 36 - 50

LABELLING ACCORDING TO STANDARD

Standard for safety footwear EN ISO 20345 S3 Basic requirement for S3:

A Antistatic shoe - E Energy absorption in the heel - FO Fuel resistance -

WRU Water penetration and water absorption resistant upper - **P** Penetration resistance - Closed heel area - Profiled outsole

Additional requirements

SRC Slip resistance: Slip resistant on floors of ceramic tiles with a sodium lauryl sulfate (SLS) solution and on steel floors with glycerol. When it comes to slip resistance as defined by EN ISO 20345, SRC signifies the best possible rating a safety shoe can reach.

CI COLD INSULATED

FORM

Safety pull-on boot

Form C - in size 42, the upper height must be at least 17.8 cm.

AREAS OF APPLICATION

Areas of application

Indoors and outdoors

Areas where exposure to moisture is expected (S2)

Areas where there is a risk of penetration from pointed and sharp objects (S3)

Areas where there is a risk of electrostatic discharge (ESDS/ESD)

Cold areas, working in winter, road construction etc.

FEATURES

ESD equipment

Thanks to its excellent discharge capability, the shoe is suitable for work in ESD sensitive or electrostatically protected areas (EPA). The shoes comply to the standard 61340-5-1.

FEATURES	
Sizes (unisex model)	Expanded size range: available in sizes 36 - 50
Certification in accordance with DGUV rule 112-191	Certified for orthopaedic modifications / inserts
Collar padding	Excellent wearing comfort: the ankle-wrapping, softly padded upper edge provides for stability and grip in the shoe.
Donning loops	Quicker into the boot: Loops make it easier to put the boots on.
High boot without laces or zippers	Quick getting in and out
PU toe protection (polyurethane)	 Directly applied tip protection Excellent wear protection in the shoe tip area Protects the upper material in this area against premature wear
UPPER MATERIAL	
Cowhide leather	 Areas of application S1/S2/S3 Natural material Wear-resistant Breathable Water penetration/absorption in accordance with EN ISO 20345 S2
Sustainably produced leather ECO FRIENDLY FEATHER	Manufactured in Germany according to high social and ecological standards
LINING	
Warm lining	 Good ventilation Skin-friendly High absorption of moisture
Heel pocket lining	The abrasion-resistant microfibre material is particularly sturdy and provides for a pleasant wearing comfort.
TOE PROTECTION	CAP
Steel toe cap	 Protection against impacts of min. 200 joules and pressure loading of min. 15 kN Permanent edge coverage for cushioning Ergonomically shaped Comfortable toe room Good coverage of the little toe area

INLAY SOLE

Full-length inlay sole made of fleece

- The full-length, exchangeable inlay sole provides the highest possible comfort in safety shoes.
- The inlay sole is functionally absorbing and releasing moisture and thus provides for a pleasant foot climate.
- Antistatic

PENETRATION RESISTANCE

Metal-free penetration protection

The textile midsole complies with the penetration safety standard EN 12568 and furthermore fulfils the additional requirements for penetration protection in accordance with EN ISO 20344 / 20345. The light and flexible material enables an increased elasticity of the shoe, which can particularly be recognized when working on uneven grounds or on your knees.

The textile variant offers 100 % foot coverage compared to steel midsoles (foot coverage 85 % due to limits in the shoe manufacturing process). Being 100 % metal-free and antimagnetic, this equipment is used as penetration protection in safety shoes.

OUTSOLE

SAFETY-GRIP deeptreaded double-density sole with profile

• Excellent slip resistance

Antistatic

Outsole: PU (polyurethane)

· Colour: black

• Profile depth: 6.0 mm

Abrasion-resistant

• Heat-resistant to approx. 130°C

Flexible at cold temperatures to approx. -20°C

Oil and fuel resistant

Midsole: PU (polyurethane)

 The soft PU core provides a good impact absorption and high wearing comfort
