

## MOBILE SIZING KIT TROLLEY

ITEM NO.: Z50002

### FEATURES

With the well-proven and unique sizing kit the right size in length and width can be established quickly, easily and, above all, reliably.

The midfoot is supported due to the 3-dimensional surface, which portrays the exact interior of our shoes. It feels as if you were stepping into an actual shoe. Instead of measuring feet merely metrically, the sizing kit also takes the subjective feeling of the wearer into consideration.

Differing widths in moulds per shoe length portray the volume of shoes with varying widths. The wearer experiences the same conditions as in the original shoe. In comparison with standard methods of trying on shoes, this system saves time and reduces the risk of returns due to incorrect fit.

Furthermore, the practical sizing kit stores the moulds neatly and only uses up half a square metre of room. The Mobile Sizing Kit Trolley is robust, rollable and therefore ideally suited for transport.

With multilingual instructions.

The Mobile Sizing Kit Trolley includes moulds in women's sizes 36 - 42 and men's sizes 39 - 47.
