

THERMO REALIZER

ITEM NO.: Z51000

FEATURES

The selection of the right foot bed insole should be as specific as the individual foot of the shoe wearer. The THERMO REALIZER is an innovative way to provide individual foot bed advice.

Instructions:

The person stands for five seconds (in socks) on the Thermo Realizer. The body heat generated creates a print showing the stressed zones of the foot. This footprint is compared with the sketches shown next to it, showing you directly which insole is required.

Content:

- Thermo Realizer
- Microfibre cloth
- Disinfectant spray
- Manual
