<b>TECHN</b>	<b>ICAL DATA SHEET</b>
MARTEN XXSports	s blue Low ESD S1P No. 728121 Sz. 35 - 48
LABELLING ACCO	RDING TO STANDARD
Standard for safety footwear EN ISO 20345 S1P	Basic requirement for S1P: <b>A</b> Antistatic shoe - <b>E</b> Energy absorption in the heel - <b>FO</b> Fuel resistance - <b>P</b> Penetration resistance - Closed heel area
Additional requirements	<b>SRA</b> Slip resistance: Slip resistant on floors of ceramic tiles with a sodium lauryl sulfate (SLS) solution.
FORM	
Safety shoe	Form A - in size 42, the upper height must not exceed 11.2 cm.
AREAS OF APPLIC	ATION
Areas of application	Dry work areas Industry, storage, transport, assembly etc. Areas where there is a risk of penetration from pointed and sharp objects (S1P)
	Areas where there is a risk of electrostatic discharge (ESDS/ESD)
	Workplaces on hard Undergrounds: The revolutionary Infinergy <sup>®</sup> sole core cushions impacts and provides for a rebound effect when the compressive impulse subsides - for more energy in every step.
FEATURES	
ESD equipment	Thanks to its excellent discharge capability, the shoe is suitable for work in ESD sensitive or electrostatically protected areas (EPA). The shoes comply to the standard 61340-5-1.
Sizes (unisex model)	• Expanded size range: available in sizes 35 - 48

FEATURES	
Padded upper edge	<ul> <li>Excellent wearing comfort: the padded upper edge protects the Achilles tendon.</li> </ul>
Full, padded bellows tongue	<ul> <li>Excellent wearing comfort: The tongue prevents pressure marks and avoids dirt from entering into the shoe.</li> </ul>
Heel loop	• Quicker into the shoe: The heel loop makes it easier to get inside the shoe
Sole core made of Infinergy <sup>®</sup> by BASF	The sole core consists of expanded, thermoplastic polyurethane in the form of oval foam beads. These stick together and are very light and elastic. This revolutionary technology cushions the impact and bounces back extremely well on pressure, so that the energy can be returned to the wearer. Even under low temperatures of -20 °C, the core maintains its high elasticity.
Leather-free equipment	Suitable for persons allergic to leather
UPPER MATERIAL	
Microfibre	<ul> <li>Synthetic material</li> <li>Particularly soft</li> <li>Retains its shape</li> <li>Tear-resistant</li> <li>Quick drying</li> <li>Abrasion-resistant and light</li> </ul>
Mesh material	<ul> <li>Areas of application S1</li> <li>Synthetic material</li> <li>Retains its shape</li> <li>Tear-resistant</li> <li>Quick drying</li> <li>Abrasion-resistant and light</li> </ul>
LINING	
Breathable fabric lining	<ul> <li>Climate-regulating</li> <li>Good ventilation</li> <li>Skin-friendly</li> <li>High absorption and emission of moisture</li> </ul>
Heel pocket lining	<ul> <li>The abrasion-resistant microfibre material is particularly sturdy and provides for a pleasant wearing comfort.</li> </ul>
TOE PROTECTION	CAP
Steel toe cap	<ul> <li>Protection against impacts of min. 200 joules and pressure loading of min. 15 kN</li> <li>Permanent edge coverage for cushioning</li> <li>Ergonomically shaped</li> <li>Comfortable toe room</li> <li>Good coverage of the little toe area</li> </ul>

INLAY SOLE		
Full-length inlay sole SPORTIVE ESD (rec)	<ul> <li>ESD EQUIPMENT: Protection against electrostatic discharge (ESD). The full-length, exchangeable inlay sole is conductive and designed for the use in ESD safety footwear according to the standards DIN EN ISO 20345 and DIN EN 61340-5-1.</li> <li>Inlay sole with recycled material content</li> <li>The full-length, exchangeable inlay sole provides the highest possible comfort in safety shoes.</li> <li>Improvement of the shoe climate thanks to the PU foam's open cell structure. So the foot is always kept comfortably dry.</li> <li>The extreme softness of the PU foam absorbs shocks on impact and increases walking comfort.</li> </ul>	
PENETRATION RESISTANCE		
Metal-free penetration protection	The textile midsole complies with the penetration safety standard EN 12568 and furthermore fulfils the additional requirements for penetration protection in accordance with EN ISO 20344 / 20345. The light and flexible material enables an increased elasticity of the shoe, which can particularly be recognized when working on uneven grounds or on your knees.	
	The textile variant offers 100 % foot coverage compared to steel midsoles (foot coverage 85 % due to limits in the shoe manufacturing process). Being 100 % metal-free and antimagnetic, this equipment is used as penetration protection in safety shoes.	
OUTSOLE		
WELLMAXX SPORTS double-density sole with profile	Antistatic	
	Outsole: TPU (thermoplastic polyurethane)	
	<ul> <li>Colour: lightblue</li> <li>Profile depth: 3.5 mm</li> <li>Abrasion-resistant</li> <li>Heat-resistant to approx. 130°C</li> <li>Flexible at cold temperatures to approx20°C</li> <li>Oil and fuel resistant</li> </ul>	
	Midsole: PU (polyurethane) with a core made of $Infinergy^{\ensuremath{\mathbb{R}}}$ by BASF	
	<ul> <li>The core made of Infinergy<sup>®</sup> provides a very good cushioning with rebound effect</li> <li>Extra-thick midsole for improved cushioning</li> </ul>
