TECHNICAL DATA SHEET

HENNY XXTL black Mid ESD S3 No. 746581

Sz. 35 - 42

LABELLING ACCO	RDING TO STANDA	RD	
Standard for safety footwear EN ISO 20345 S3	Basic requirement for S3: A Antistatic shoe - E Energy absorption in the heel - FO Fuel resistance - WRU Water penetration and water absorption resistant upper - P Penetration resistance - Closed heel area - Profiled outsole		
Additional requirements	SRC Slip resistance: Slip resistant on floors of ceramic tiles with a sodium lauryl sulfate (SLS) solution and on steel floors with glycerol. When it comes to slip resistance as defined by EN ISO 20345, SRC signifies the best possible rating a safety shoe can reach.		
FORM	I		
Ladies' safety boot	Form B - in size 38, the u	oper height must be at least 10.5 cm.	
FIT			
Ladies' fit	The shoe last is ideally tai	lored to the ergonomics of female feet.	
AREAS OF APPLIC	ATION		
Areas of application	Indoors and outdoors Areas where exposure to moisture is expected (S2) Areas where there is a risk of penetration from pointed and sharp objects (S3)		
	Areas where there is a risl	<pre>< of electrostatic discharge (ESDS/ESD)</pre>	
		grounds: The revolutionary Infinergy [®] sole core vides for a rebound effect when the compressive re energy in every step.	

FEATURES		
ESD equipment	Thanks to its excellent discharge capability, the shoe is suitable for work in ESD sensitive or electrostatically protected areas (EPA). The shoes comply to the standard 61340-5-1.	
Certification in accordance with DGUV rule 112-191	Certified for orthopaedic inserts	
Padded upper edge	 Excellent wearing comfort: the padded upper edge protects the Achilles tendon. 	
Full, padded bellows tongue	 Excellent wearing comfort: The tongue prevents pressure marks and avoids dirt from entering into the shoe. 	
Reflective material	Good visibility in the dark	
Heel loop	• Quicker into the shoe: The heel loop makes it easier to get inside the shoe	
Sole core made of Infinergy [®] by BASF	The sole core consists of expanded, thermoplastic polyurethane in the form of oval foam beads. These stick together and are very light and elastic. This revolutionary technology cushions the impact and bounces back extremely well on pressure, so that the energy can be returned to the wearer. Even under low temperatures of -20 °C, the core maintains its high elasticity.	
Winner Plus X Award	The independent jury for the Plus X Award, the Innovation Prize for Technology, Spot, and Lifestyle, grants a total of seven seals of approval to brands that offer products with a competitive edge in terms of quality and innovation. ELTEN has always seen itself as an innovative business at the cutting edge of technology.	
UPPER MATERIAL		
Hydrophobized nubuck leather	 Areas of application S2/S3 Natural material Wear-resistant Breathable Water penetration/absorption in accordance with EN ISO 20345 S2 By hydrophobation, higher resistance against water penetration and water absorption 	
Textile material Cordura [®] (hydrophobized) CORDURA	 Areas of application S2/S3 Synthetic material Particularly resistant to wear and tear Retains its shape Tear-resistant Dries quickly Abrasion-resistant and light Water penetration and absorption in accordance with EN ISO 20345 S2; an improved resistance against water penetration is achieved by a special hydrophobation of the material 	

 Climate-regulating Good ventilation Skin-friendly High absorption and emission of moisture 		
 The abrasion-resistant microfibre material is particularly sturdy and provides for a pleasant wearing comfort. 		
CAP		
 Protection against impacts of min. 200 joules and pressure loading of min. 15 kN Permanent edge coverage for cushioning Ergonomically shaped Comfortable toe room Good coverage of the little toe area 		
 ESD EQUIPMENT: Protection against electrostatic discharge (ESD). The full-length, exchangeable inlay sole is conductive and designed for the use in ESD safety footwear according to the standards DIN EN ISO 20345 and DIN EN 61340-5-1. The inlay sole is individually adapted to the fitting of safety footwear for women. The full-length, exchangeable inlay sole provides the highest possible comfort in safety shoes. Improvement of the shoe climate thanks to the PU foam's open cell structure. So the foot is always kept comfortably dry. The extreme softness of the PU foam absorbs shocks on impact and increases walking comfort. 		
PENETRATION RESISTANCE		
The textile midsole complies with the penetration safety standard EN 12568 and furthermore fulfils the additional requirements for penetration protection in accordance with EN ISO 20344 / 20345. The light and flexible material enables an increased elasticity of the shoe, which can particularly be recognized when working on uneven grounds or on your knees. The textile variant offers 100 % foot coverage compared to steel midsoles (foot coverage 85 % due to limits in the shoe manufacturing process). Being 100 % metal-free and antimagnetic, this equipment is used as penetration protection in safety shoes.		

OUTSOLE		
WELLMAXX TRAINERS LADY double-density sole with profile	Excellent slip resistanceAntistatic	
	Outsole: PU (polyurethane) • Colour: red • Profile depth: 4.0 mm • Abrasion-resistant • Heat-resistant to approx. 130°C • Flexible at cold temperatures to approx20°C • Oil and fuel resistant	
	 Midsole: PU (polyurethane) with a core made of Infinergy[®] by BASF The soft PU core provides a good impact absorption and high wearing comfort 	
	 The core made of Infinergy[®] provides a very good cushioning with rebound effect
