Series 7400 Krafftform torque screwdrivers with a customised factory pre-set measurement value, pistol handle, 7462 x 3.0-6.0 Nm  
 Series 7400 Krafftform Torque Screwdrivers, adjustable to customer requirements within the specified measurement range

**Customised pre-setting**

Pre-set, adjustable torque screwdrivers

Wera torque screwdriver. With a customised factory pre-set torque value. For all applications, where the same constant torque and repeat accuracy are required.

**Versatile**

Rapidaptor technology makes the tool adaptable since bits and sockets can be exchanged rapidly.

**Chuck-all**

The Rapidaptor quick-release chucks hold 1/4" DIN ISO 1173-C 6,3 and E 6,3 as well as Wera series 1 and 4 bits.

**Rapid-in and self-lock**

The bit can be pushed into the adaptor without moving the sleeve. The lock is activated automatically as soon as the bit is applied to the screw. Bits are held securely and wobble-free.

**Rapid-out**

Simply push the sleeve forward to change the bit. The spring mechanism lifts the bit off the magnet and unlocks the tool. The bit can be easily removed. The rapid-out function makes it easy to remove even the smallest bits without extra tools.

**Single-hand function**

Every function of the Rapidaptor quick-release chuck, such as inserting or releasing bits, can be carried out with one hand. This is faster, more economical and more ergonomic. There are no unnecessary manoeuvres.

**Unlimited torque**

Unlimited torque for loosening seized screws.
