Product description:

- active protection by horizontal und vertical light cable system (4 light cables)
- integrated cables at back between shellfabric and lining
- reflective tapes at shoulder and body
- velcro fastener for easy closure of vest
- 1 battery bag inside from 2-layer fabric to put portable battery inside, with velcro closure
- a small opening at side of bag for USB- connector
- Switch to activate the vest and to adjust the light modes
- backpart with direct embroidery

Attention ! In addition to the two operating modes continuous light (1) and flashing (2), the active light guide has an operating mode for fast pulse light (3). It must be clearly warned that an impairment of correspondingly sensitive carriers by this operating mode (3) cannot be completely excluded! It is strongly recommended to refrain from operating in this mode for a longer period of time.
