#### PPE- category II

EN ISO 20471

#### product description:

- active protection by vertical light guide system (2 light cabels)
- integrated cabels at back between shellfabric and lining
- reflective tapes at shoulder and body
- velcro fastener for easy closure of vest
- 1 battery bag inside from 2-layer fabric to put portable battery inside, with velcro closure
- Switch for activating and adjusting the light modes
- a small opening at side of bag for USB- connector

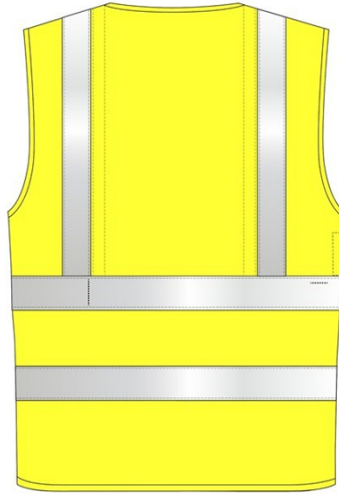

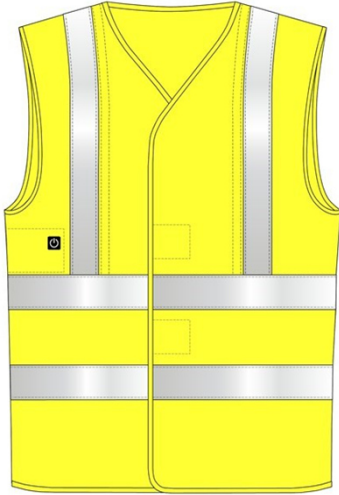

Attention ! In addition to the two operating modes continuous light (1) and flashing (2), the active light guide has an operating mode for fast pulse light (3). It must be clearly warned that an impairment of correspondingly sensitive carriers by this operating mode (3) cannot be completely excluded! It is strongly recommended to refrain from operating in this mode for a longer period of time.
