

9740 Foam insert L-key set 1, 20 pieces

Foam inserts for roller cabinet

EAN:	4013288225108	Size:	405x185x55 mm
Part number:	05150140001	Weight:	1545 g
Article number:	9740	Country of origin:	CZ
		Customs tariff number:	82060000

- Durable foam insert, each tool has its own place; two-coloured, missing tools will quickly be noticed
- High-quality, durable foam insert without chemical vapours
- Optimum fit for the best possible removal of the tools from the foam insert
- Water- and oil-repellent, low maintenance and easy to clean
- Protection of the tool from dirt and impact
- Thanks to their Hex-Plus profile, the 950 L-keys let hexagonal socket screws live longer
- All L-keys with "Take it easy" tool finder: Colour coding by size
- All L-keys have a colour-coded, easy-grip hose sleeve for ergonomic and comfortable operation even at low temperatures

Durable foam insert; two-coloured for quick identification of missing parts; suitable for the Tool Rebel roller cabinet; equipped with 9-piece Wera L-key set 950/9 Hex-Plus Multicolour 1 for hexagonal socket screws, 9-piece Wera L-key set 967/9 TX XL Multicolour 1 for TORX® screws, one 9500 magnet, one Stabila pocket tape measure (3 m).

Foam inserts for roller cabinet

Safe storage and quick overview

The tools sit securely in the foam thanks to precise contour cutouts, but are easy to remove. The carefully designed arrangement of the tools ensures space-saving storage and quick access to each tool.

Two-coloured foam insert

After removing the tool the light grey second foam becomes visible and therefore missing tools are quickly identified.

L-keys with a thermoplastic sleeve

L-keys made from circular material fit into the hand better and allow less strenuous work over a longer period. Additionally, the rubber sleeve provides a pleasant grip, particularly in applications at low temperatures. Colour coding and large stamp enable the desired L-key to be easily located. Moreover, the round material keys are more robust, particularly where smaller sizes are concerned.

Hex-Plus

Hexagon screws can endure a problem because the contact surfaces delivering the power from the conventional tool, is transferred to the screw via very small surface areas. The consequence: the screw can become damaged (rounding out). Hex-Plus tools have a greater contact surface that prevents this from happening! At the same time, as much as 20 % more torque can be applied. Good to know: Hex-Plus tools fit into every standard hexagon socket screw!

Ball tip

The spherical drive profile means that it is possible to swivel the axis of the tool to that of the screw, and therefore enable angled, "around-the-corner" screwdriving jobs.

Take it easy tool finder system

Take it easy tool finder system - with profile and size colour-coding for quick and easy tool selection. Colour-coded system for hexagon drive screws (L-Keys, Zyklop bit sockets), external hex drive screws and nuts (Joker wrenches, Zyklop sockets and Zyklop bit sockets with holding function), and TORX® drive screws (L-Keys, Zyklop bit sockets).

Magnetising

With the Wera magnetiser/demagnetiser: simply run the tool down the positive side of the Wera magnetiser/demagnetiser and the tool immediately becomes magnetised and is able to hold the screw securely on the blade.

Demagnetising

To demagnetise, move the tool along the negative side.
