## Product data sheet

Article no.: E9102VK ESD-Reinforcement struts for shelved trolleys

These electrically conductive struts in slate grey are easily screwed under an existing shelf. That stabilises the upper structure and increases the capacity of the inserted shelves. The shelf located on top of the longitudinal connector struts has a carrying capacity of 110kg instead of 50kg due to the support. The electrical conductivity is maintained. 1 pair per ESD-trolley is included.
