TECHN	ICAL DATA SH	
jo_SPEEDY black-	blue Easy ESD S1P No. 11171	Sz. 36 - 48
LABELLING ACCO	RDING TO STANDARD	
Standard for safety footwear EN ISO 20345 S1P	Basic requirement for S1P: A Antistatic shoe - E Energy absorption in the heel - FO Fuel resistance - P Penetration resistance - Closed heel area	
Additional requirements	SRC Slip resistance: Slip resistant on floors of ceramic tiles with a sodium lauryl sulfate (SLS) solution and on steel floors with glycerol. When it comes to slip resistance as defined by EN ISO 20345, SRC signifies the best possible rating a safety shoe can reach.	
	HRO HEAT RESISTANT OUTSOLE Heat resistance against contact heat, also during s	short-term high temperatures
FORM		
Safety sandal	Form A - in size 42, the upper height must not exceed 11.2 cm.	
AREAS OF APPLIC	ATION	
Areas of application	Dry work areas Industry, storage, transport, assembly etc. Areas where there is a risk of penetration from po	inted and sharp objects (S1P)
	Areas where there is a risk of electrostatic dischar	ge (ESDS/ESD)
FEATURES		
ESD equipment	Thanks to its excellent discharge capability, the sh work in ESD sensitive or electrostatically protected shoes comply to the standard 61340-5-1.	
Sizes (unisex model)	• Expanded size range: available in sizes 36 - 4	8

FEATURES		
Certification in accordance with DGUV rule 112-191	Certified for orthopaedic inserts	
Padded upper edge	 Excellent wearing comfort: the padded upper edge protects the Achilles tendon. 	
Padded tongue	• Excellent wearing comfort: The tongue prevents pressure marks.	
Hook-and-pile fastener	 Can be opened and closed easily and quickly Individually adjustable for optimal adaptation to the foot Improves the comfort and fit 	
No metal or leather	 Low weight Suitable for work areas sensitive to metal Does not trigger metal detectors Use around induction loops is possible Suitable for persons allergic to leather 	
UPPER MATERIAL		
Mesh material	 Areas of application S1 Synthetic material Retains its shape Tear-resistant Quick drying Abrasion-resistant and light 	
Microfibre	 Synthetic material Particularly soft Retains its shape Tear-resistant Quick drying Abrasion-resistant and light 	
LINING		
Breathable fabric lining	 Climate-regulating Good ventilation Skin-friendly High absorption and emission of moisture 	
Heel pocket lining	 The abrasion-resistant microfibre material is particularly sturdy and provides for a pleasant wearing comfort. 	

TOE PROTECTION	CAP	
Composite toe cap	 Protection against impacts of min. 200 joules and pressure loading of min. 15 kN Permanent edge coverage for cushioning Ergonomically shaped Comfortable toe room Good coverage of the little toe area Low weight - weighs less than conventional steel caps 100% metal-free 100% anti-magnetic 	
INLAY SOLE		
Full-length inlay sole JORI ESD	 ESD EQUIPMENT: Protection against electrostatic discharge (ESD). The full-length, exchangeable inlay sole is conductive and designed for the use in ESD safety footwear according to the standards DIN EN ISO 20345 and DIN EN 61340-5-1. The full-length, exchangeable inlay sole provides the highest possible comfort in safety shoes. The inlay sole is functionally absorbing and releasing moisture and thus provides for a pleasant foot climate. 	
PENETRATION RESISTANCE		
Metal-free penetration protection	The textile midsole complies with the penetration safety standard EN 12568 and furthermore fulfils the additional requirements for penetration protection in accordance with EN ISO 20344 / 20345. The light and flexible material enables an increased elasticity of the shoe, which can particularly be recognized when working on uneven grounds or on your knees. The textile variant offers 100 % foot coverage compared to steel midsoles (foot coverage 85 % due to limits in the shoe manufacturing process). Being 100 % metal-free and antimagnetic, this equipment is used as penetration protection in	
	safety shoes.	
OUTSOLE		
jo_DYNAMIC double- density sole with profile	AntistaticExcellent slip resistance	
	Outsole: Rubber • Colour: black, with coloured inserts • Profile depth: 3.0 mm • Particularly abrasion-resistant • Heat-resistant to approx. 200°C, for short periods to 300°C • Flexible at cold temperatures to approx20°C • Oil and fuel resistant • Resistant to a large number of chemicals (acids and alkalis) • Notch-resistant Midsole: EVA (Ethylene-Vinyl-Acetate)	
	Excellent damping qualitiesLow material density, thereby lower weight
