TECHNICAL DATA SHEET		
FRANCESCO XXS 728731	G GTX black Low ESD S3 CI No. Sz. 36 - 48	
LABELLING ACCOR	RDING TO STANDARD	
Standard for safety footwear EN ISO 20345 S3	Basic requirement for S3: A Antistatic shoe - E Energy absorption in the heel - FO Fuel resistance - WRU Water penetration and water absorption resistant upper - P Penetration resistance - Closed heel area - Profiled outsole	
Additional requirements	<b>SRC</b> Slip resistance: Slip resistant on floors of ceramic tiles with a sodium lauryl sulfate (SLS) solution and on steel floors with glycerol. When it comes to slip resistance as defined by EN ISO 20345, SRC signifies the best possible rating a safety shoe can reach.	
	CI COLD INSULATED	
FORM		
Safety shoe	Form A - in size 42, the upper height must not exceed 11.2 cm.	
AREAS OF APPLIC	ATION	
Areas of application	Indoors and outdoors Areas where exposure to moisture is expected (S2) Areas where there is a risk of penetration from pointed and sharp objects (S3)	
	Areas where there is a risk of electrostatic discharge (ESDS/ESD)	
FEATURES		
ESD equipment	Thanks to its excellent discharge capability, the shoe is suitable for work in ESD sensitive or electrostatically protected areas (EPA). The shoes comply to the standard 61340-5-1.	
Sizes (unisex model)	• Expanded size range: available in sizes 36 - 48	

FEATURES		
Certification in accordance with DGUV rule 112-191	Certified for orthopaedic inserts	
Full, padded bellows tongue	<ul> <li>Excellent wearing comfort: The tongue prevents pressure marks and avoids dirt from entering into the shoe.</li> </ul>	
Collar padding	<ul> <li>Excellent wearing comfort: the ankle-wrapping, softly padded upper edg provides for stability and grip in the shoe.</li> </ul>	je
Reflective material	Good visibility in the dark	
Sole core made of Infinergy <sup>®</sup> by BASF	The sole core consists of expanded, thermoplastic polyurethane in the form of oval foam beads. These stick together and are very light and elastic. This revolutionary technology cushions the impact and bounces back extremely well on pressure, so that the energy can be returned to the wearer. Even under low temperatures of -20 °C, the core maintains its high elasticity.	ergy.
PU toe protection (polyurethane)	<ul> <li>Directly applied tip protection</li> <li>Excellent wear protection in the shoe tip area</li> <li>Protects the upper material in this area against premature wear</li> </ul>	
Winner Plus X Award	The independent jury for the Plus X Award, the Innovation Prize for Technology, Spot, and Lifestyle, grants a total of seven seals of approval to brands that offer products with a competitive edge in terms of quality and innovation. ELTEN has always seen itself as an innovative business at the cutting edge of technology.	×
UPPER MATERIAL		
Cowhide leather	<ul> <li>Areas of application S1/S2/S3</li> <li>Natural material</li> <li>Wear-resistant</li> <li>Breathable</li> <li>Water penetration/absorption in accordance with EN ISO 20345 S2</li> </ul>	
LINING		
Gore-Tex Performance Comfort Footwear	The GORE-TEX membrane prevents water from entering into the shoe, but st allows your feet to "breathe". This technology provides ideal climate comfort all outdoor activities, even in the harshest weather conditions. All component of the shoe construction are precisely attuned to one another and are subject constant quality controls. The ALL-WEATHER membrane The all-weather membrane constantly provides an ideal climate comfort inside the shoe in all wind and weather conditions. Keeps your feet cool in summer warm in winter. Tiny pores keep wind and wetness outside.	for ts tt to de

ELTEN

LINING	
Heel pocket lining	<ul> <li>The abrasion-resistant microfibre material is particularly sturdy and provides for a pleasant wearing comfort.</li> </ul>
TOE PROTECTION	САР
Steel toe cap	<ul> <li>Protection against impacts of min. 200 joules and pressure loading of min. 15 kN</li> <li>Permanent edge coverage for cushioning</li> <li>Ergonomically shaped</li> <li>Comfortable toe room</li> <li>Good coverage of the little toe area</li> </ul>
INLAY SOLE	
Full-length inlay sole ARTISAN ESD Level 2	<ul> <li>ESD EQUIPMENT: Protection against electrostatic discharge (ESD). The full-length, exchangeable inlay sole is conductive and designed for the use in ESD safety footwear according to the standards DIN EN ISO 20345 and DIN EN 61340-5-1.</li> <li>Full inlay sole in three different heights to optimise the fit</li> <li>Level 1: Noticeably more comfort for sturdy feet</li> <li>Level 2: Provides comfortable cushioning for moderately sturdy feet</li> <li>Level 3: Effective shock absorption and increased grip for slim feet</li> <li>The inlay sole is functionally absorbing and releasing moisture and thus provides for a pleasant foot climate.</li> <li>Improvement of the shoe climate thanks to the PU foam's open cell structure. So the foot is always kept comfortably dry.</li> <li>The extreme softness of the PU foam absorbs shocks on impact and increases walking comfort.</li> <li>The full-length, exchangeable inlay sole provides the highest possible comfort in safety shoes.</li> </ul>
PENETRATION RES	SISTANCE
Metal-free penetration protection	The textile midsole complies with the penetration safety standard EN 12568 and furthermore fulfils the additional requirements for penetration protection in accordance with EN ISO 20344 / 20345. The light and flexible material enables an increased elasticity of the shoe, which can particularly be recognized when working on uneven grounds or on your knees. The textile variant offers 100 % foot coverage compared to steel midsoles (foot coverage 85 % due to limits in the shoe manufacturing process). Being 100 % metal-free and antimagnetic, this equipment is used as penetration protection in safety shoes.

OUTSOLE	
WELLMAXX SAFETY-GRIP deep-treaded double- density sole with profile	<ul> <li>S-line shaped configuration of the tread blocks, for an ergonomic foot roll</li> <li>Excellent slip resistance</li> <li>Antistatic</li> </ul>
	Outsole: PU (polyurethane) • Colour: black • Profile depth: 6.0 mm • Particularly abrasion-resistant • Heat-resistant to approx. 130°C • Flexible at cold temperatures to approx20°C • Oil and fuel resistant
	Midsole: PU (polyurethane) with a core made of $Infinergy^{(\!8\!)}$ by BASF
	<ul> <li>The core made of Infinergy<sup>®</sup> provides a very good cushioning with rebound effect</li> </ul>
	<ul> <li>The soft PU core provides a good impact absorption and high wearing comfort</li> </ul>
