| FORM   |  |   |             |
| Safety shoe  | Form A - in size 42, the up  | oper height must not exceed 11.2 o  | cm.         |
| AREAS OF APPLIC  | ATION  |   |             |
| Areas of application                                     | Areas where there is a risl  | < of electrostatic discharge (ESDS/   | ESD)        |
| FEATURES   |  |   |             |
| ESD equipment  |  | charge capability, the shoe is suita<br>lectrostatically protected areas (EF<br>lard 61340-5-1. |             |
| Sizes (unisex model)                                     | • Expanded size range:   | available in sizes 35 - 49  |             |
| Certification in<br>accordance with DGUV<br>rule 112-191 | Certified for orthopae   | dic inserts   |             |

| FEATURES  |  |  |
|---|--|--|
| Padded upper edge                                   | • Excellent wearing comfort: the padded upper edge protects the Achilles tendon.   |  |
| Full, padded bellows<br>tongue                      | <ul> <li>Excellent wearing comfort: The tongue prevents pressure marks and<br/>avoids dirt from entering into the shoe.</li> </ul>   |  |
| Reflective material                                 | Good visibility in the dark  |  |
| Sole core made of<br>Infinergy <sup>®</sup> by BASF | The sole core consists of expanded, thermoplastic polyurethane in the form of oval foam beads. These stick together and are very light and elastic. This revolutionary technology cushions the impact and bounces back extremely well on pressure, so that the energy can be returned to the wearer. Even under low temperatures of -20 °C, the core maintains its high elasticity.                          |  |
| No metal or leather                                 | <ul> <li>Low weight</li> <li>Suitable for work areas sensitive to metal</li> <li>Does not trigger metal detectors</li> <li>Use around induction loops is possible</li> <li>Suitable for persons allergic to leather</li> </ul>   |  |
| UPPER MATERIAL                                      |  |  |
| Hydrophobized<br>microfibre                         | <ul> <li>Areas of application S2/S3</li> <li>Synthetic material</li> <li>Particularly soft</li> <li>Retains its shape</li> <li>Tear-resistant</li> <li>Dries quickly</li> <li>Abrasion-resistant and light</li> <li>Water penetration and absorption in accordance with EN ISO 20345 S2; an improved resistance against water penetration is achieved by a special hydrophobation of the material</li> </ul> |  |
| Hydrophobized textile<br>material                   | <ul> <li>Areas of application S2/S3</li> <li>Synthetic material</li> <li>Shape-retaining</li> <li>Tear-resistant</li> <li>Dries quickly</li> <li>Wear-resistant and light</li> <li>Water penetration/absorption in accordance with EN ISO 20345 S2</li> <li>By hydrophobation, higher resistance against water penetration and water absorption</li> </ul>   |  |
| LINING  |  |  |
| Breathable fabric lining                            | <ul> <li>Climate-regulating</li> <li>Good ventilation</li> <li>Skin-friendly</li> <li>High absorption and emission of moisture</li> </ul>  |  |
| Heel pocket lining                                  | <ul> <li>The abrasion-resistant microfibre material is particularly sturdy and<br/>provides for a pleasant wearing comfort.</li> </ul>   |  |

| TOE PROTECTION                       | CAP   |
|--------------------------------------|---|
| Composite toe cap                    | <ul> <li>Protection against impacts of min. 200 joules and pressure loading of min. 15 kN</li> <li>Permanent edge coverage for cushioning</li> <li>Ergonomically shaped</li> <li>Comfortable toe room</li> <li>Good coverage of the little toe area</li> <li>Low weight - weighs less than conventional steel caps</li> <li>100% metal-free</li> <li>100% anti-magnetic</li> </ul>  |
| INLAY SOLE                           |   |
| Full-length inlay sole<br>ESD PRO    | <ul> <li>ESD EQUIPMENT: Protection against electrostatic discharge (ESD). The full-length, exchangeable inlay sole is conductive and designed for the use in ESD safety footwear according to the standards DIN EN ISO 20345 and DIN EN 61340-5-1.</li> <li>The full-length, exchangeable inlay sole provides the highest possible comfort in safety shoes.</li> <li>The inlay sole is functionally absorbing and releasing moisture and thus provides for a pleasant foot climate.</li> <li>The extreme softness of the PU foam absorbs shocks on impact and increases walking comfort.</li> <li>Improvement of the shoe climate thanks to the PU foam's open cell structure. So the foot is always kept comfortably dry.</li> </ul> |
| PENETRATION RES                      | SISTANCE  |
| Metal-free penetration<br>protection | The textile midsole complies with the penetration safety standard EN 12568 and<br>furthermore fulfils the additional requirements for penetration protection in<br>accordance with EN ISO 20344 / 20345. The light and flexible material enables<br>an increased elasticity of the shoe, which can particularly be recognized when<br>working on uneven grounds or on your knees.<br>The textile variant offers 100 % foot coverage compared to steel midsoles (foot<br>coverage 85 % due to limits in the shoe manufacturing process). Being 100 %<br>metal-free and antimagnetic, this equipment is used as penetration protection in<br>safety shoes.  |

| OUTSOLE  |   |  |
|--|---|--|
| WELLMAXX TRAINERS<br>POWER double-density<br>sole with profile | <ul><li>Excellent slip resistance</li><li>Antistatic</li></ul>  |  |
|  | Outsole: TPU (thermoplastic polyurethane)<br>• Colour: red, with coloured inserts<br>• Profile depth: 3.5 mm<br>• Abrasion-resistant<br>• Heat-resistant to approx. 130°C<br>• Flexible at cold temperatures to approx20°C<br>• Oil and fuel resistant                                    |  |
|  | <ul> <li>Midsole: PU (polyurethane) with a core made of Infinergy<sup>®</sup> by BASF</li> <li>The soft PU core provides a good impact absorption and high wearing comfort</li> <li>The core made of Infinergy<sup>®</sup> provides a very good cushioning with rebound effect</li> </ul> |  |
