

8100 SB All-in Zyklop Speed ratchet set, 3/8" drive, 35 pieces

The Zyklop Speed Ratchet, 3/8"

EAN: 4013288225573

Part number: 05003536001

Article number: 8100 SB All-in

Size: 250x170x70 mm

Weight: 2382 g

Country of origin: CZ

Customs tariff number: 82041100

- 35-piece ratchet set in robust textile box
- Freely pivoting ratchet head with 5 predefined locking positions
- Bit-sockets with all the advantages of the Wera bit technology
- TORX®, Hex-Plus and hexagon nuts with holding function for screws / nuts
- Easy removal of the ratchet thanks to Twist-to-unlock system
- Nut extractor tool
- Compatible with Wera 2go

Incredibly compact set arrangement to include many tools in minimal space. All new ratchet set feeling thanks to the highly robust and durable novel textile boxes. Can be placed in an upright position for clearly arranged storage in the workshop shelf. Additional surface protection thanks to textile outer material. Low weight and small size for better mobility. With Take it easy tool finder: Colour coding by size. Easy removal of the ratchet thanks to Twist-to-unlock system.

The Zyklop Speed Ratchet, 3/8"

Easy removal of the ratchet

The 8100 SB All-in Zyklop Speed 3/8" ratchet set fulfils every mechanics and DIYer wish.

Thanks to the Twist-to-unlock system, the ratchet can be easily removed.

Zyklop "6 in 1"

1. Fine-tooth ratchet 2. Flex-head ratchet 3. Angle ratchet 4. Quick-release ratchet 5. Power ratchet 6. Screwdriver

Pivots freely

The ratchet head pivots freely and can be locked into any defined position by using the slide switch that is positioned on either side. It is even possible to work in very confined and difficult-to-access areas with enhanced hand clearance. The predefined locking at 0°, 15° and 90°, both to the right and left, ensure safe working without any slipping of the ratchet head.

Fast movers

The Zyklop Speed ratchets are really fast movers. The gyrating mass design means that screwdriving is accelerated. The rotation-symmetric structure of the Kraftform handle and the free-turning sleeve reinforce this rapid twisting process, particularly when the ratchet does not engage due to too little resistance in the thread.

Sockets with retaining function for hexagon headed bolts, screws and nuts

The clamping of the screw is achieved by a twin spring loaded ball retention system. The tubing is effectively protected against mechanical wear and tear by a steel ring. The holding function is especially helpful in confined, hard-to-reach spaces, where there is no room for a second hand to secure the screw.

Bit sockets with holding function for TORX® screws

The HF tools developed by Wera are ideal because they feature an optimised geometry of the original TORX® profile. The wedging forces resulting from the surface pressure between the drive tip and the screw profile mean that TORX® screws made according to Acument Intellectual Properties specifications are securely held on the tool!

Bit sockets with retaining function for hexagon socket screws

The clamping of the screw is achieved by a flexible locking ball. The holding function is especially helpful in confined, hard-to-reach spaces, where there is no room for a second hand to secure the screw.
