

L-Keys for Hexagon Socket Screws

<b>EAN:</b>	4013288230263	<b>Size:</b>	113x9x42 mm
<b>Part number:</b>	05022657001	<b>Weight:</b>	52 g
<b>Article number:</b>	950 SPKS Multicolour Imperial	<b>Country of origin:</b>	CZ
		<b>Customs tariff number:</b>	82041100

- Short version
- Imperial
- L-keys for hexagonal socket screws
- Hex-Plus allows socket head screws to live longer
- Colour coded, easy-to-grip plastic sleeve, even at low temperatures
- Hexagonal ballpoint on the long arm
- Wear-resistant size marking

High quality Wera L-keys with colour coded, convenient plastic sleeve. This means that the tool is quickly accessible and the ergonomic and pleasant handle is easy on the hands even at low temperatures. Hex-Plus L-keys provide larger contact surfaces on the screw head. The notching effect is thereby reduced to a minimum; the destruction of the screw head is almost eliminated. The ball on the long arm allows safe working even in difficult mounting positions. The BlackLaser surface treatment provides excellent surface protection, corrosion resistance and long life. Laser coated abrasion-resistant size markings on the L-keys for quick access.

## L-Keys for Hexagon Socket Screws

### L-keys with a thermoplastic sleeve

We questioned the classic L-key design, since all too often the screw head recess is rounded out, meaning screws can no longer be tightened or loosened - and so the user finds the L-key slipping out of the recess. Wera Hex-Plus tools have a larger contact surface in the screw head. The notching effects are reduced and thereby the deformation of the screws. At the same time, as much as 20 % more torque can be applied.

L-keys made from circular material fit into the hand better and allow less strenuous work over a longer period. Additionally, the rubber sleeve provides a pleasant grip, particularly in applications at low temperatures. Colour coding and large stamp enable the desired L-key to be easily located. Moreover, the round material keys are more robust, particularly where smaller sizes are concerned.

### Hex-Plus

Hexagon screws can endure a problem because the contact surfaces delivering the power from the conventional tool, is transferred to the screw via very small surface areas. The consequence: the screw can become damaged (rounding out). Hex-Plus tools have a greater contact surface that prevents this from happening! At the same time, as much as 20 % more torque can be applied. Good to know: Hex-Plus tools fit into every standard hexagon socket screw!

### Ball tip

The spherical drive profile means that it is possible to swivel the axis of the tool to that of the screw, and therefore enable angled, "around-the-corner" screwdriving jobs.

## Take it easy tool finder system

Take it easy tool finder system - with profile and size colour-coding for quick and easy tool selection. Colour-coded system for hexagon drive screws (L-Keys, Zyklop bit sockets), external hex drive screws and nuts (Joker wrenches, Zyklop sockets and Zyklop bit sockets with holding function), and TORX® drive screws (L-Keys, Zyklop bit sockets).
