Product description

KL-0121-38 B - Fuel line pliers

Universally suitable for quick-release couplings as found on fuel lines in vehicles from VW-Audi, SEAT, ŠKODA, Mercedes, BMW, Renault, Peugeot, Opel/Vauxhall, Chrysler, Fiat etc.

Alternative tools:] W 163 589 00 37 00

Allows you to unlatch quick-release couplings on fuel lines professionally. An indispensable tool when changing the fuel filter or performing repairs to the fuel system for example.

Today's fuel lines generally feature quick-release couplings having very small release lugs. The use of conventional pliers is not appropriate, since the size of the clamping jaws is simply too large to fit these lugs. The adjustable fuel line pliers from GEDORE Automotive is the perfect solution here - the ingenious design of the pliers' gripping jaws, which can be swivelled by up to 90 degrees, allows even hard-to-reach couplings to be released without any damage.

Scope of delivery/component overview

Part no.	Description	Qty
KL-0121-38 B	Fuel Line Pliers	1

Technical data

Swivel range: 90°

Length: 172mm

Example of use:

1. Before commencing work, wrap a cloth around the plug-in coupling to collect any escaping fuel.
2. Push plug-in coupling (in direction of arrow A) and hold it in position.
3. Using the pliers, press release lugs (arrow B) to unlatch plug-in coupling. Then, carefully pull plug-in coupling off the fuel line (in direction of arrow C).

Note:

Use extreme caution when pulling the plug-in coupling off the fuel line. Risk of fuel under pressure escaping! Always wear safety goggles and protective clothing!

⚠ Safety instructions and regulations

- **Before using** the special tool, read and understand **all** safety instructions and **follow** them for **safe use!**
- Use the special tools **as intended** and **always** carry out maintenance and repair work in compliance with the regulations on occupational safety and accident prevention as well as the vehicle manufacturer's instructions!
- **Prior to each use**, check the special tools **carefully** for damage, loose parts or unauthorised modifications. **Never** use it if you notice any such deficiencies!
- **Always** wear your personal protective equipment (for example safety goggles, protective gloves, safety shoes) when working!
