KL-0231-40

Example of use:

KL-0231-40 Oil Filter Socket Set, DSG, angled

Applicable to VW-Audi, Seat and Skoda DSG transmissions.

Field of Application

The oil filter sockets of this set allow for the quick and professional loosening and tightening of the oil filter housing cover on DSG transmissions; required when changing the oil filter cartridge. Thanks to the specially angled design of the sockets, the removal of the battery/battery tray assembly is no longer necessary and, as a result, the time-consuming procedure of teaching-in the parameters of the different electronic control units is eliminated.
