## KL-0369-900 KC Set of Glow Plug/Spark Plug Sockets with Joint (7-piece)

Universal application.

### Field of Application

An indispensable tool set for the professional and damage-free removal and installation of spark plugs and glow plugs as well as 'PSG' glow plugs (pressure sensor glow plugs). The sockets are provided on the inside with a retaining rubber to prevent the spark plug/glow plug from falling out unintentionally.

The special ball joint and the long and slim design of the sockets allow even deep-seated glow plugs/spark plugs that are difficult to reach to be removed quickly and with ease.

Using a conventional socket risks damaging the 'PSG' glow plug during removal/installation. When removing/installing 'PSG' glow plugs, the protective cap (supplied with the tool set) must always be used in order to protect the plug connector against dirt and electrostatic charging.
