Product description

KL-1000-0115 - Wheel hub holding tool for commercial vehicles

Universal fit for commercial vehicles, municipal vehicles, and agricultural machinery.

The holding device enables the wheel head (wheel hub) to be counterheld professionally via the wheel studs. Required e.g. for loosening and controlled torque tightening of the wheel bearing, quick-release axle, and brake disc bolts, as well as the wheel capsule.

Particularly suitable also when using with the **KL-1005-1..** - wheel hub puller series., in conjunction with the mechanical drive kit.
