Kraftform Kompakt VDE Stainless

Rost frei

EAN: 4013288229427

Part number:

Article number: Kraftform Kompakt VDE

3062 iS TiE SB

05006581001

Size: 230x60x14 mm

Weight: 32 g
Country of origin: CZ

Customs tariff number:

82054000

- Kraftform Kompakt VDE interchangeable blade for cross recess screws, Phillips
- Insulated, individually tested as per IEC 60900
- Reduced shaft diameter and integrated insulation protection
- $\bullet\,$ In this way, low-lying PH screws can be accessed and actuated
- Blades made of stainless steel to prevent extraneous rust
- Vacuum ice-hardening provides the required hardness and strength
- 9 mm hex drive with with entry chamfer
- Take it easy tool finder: Colour coding by profile and laser-engraved size indication

VDE stainless blades for Kraftform Kompakt handle/blade system. Lightning-fast blade changes without special tools. Individually tested at 10,000 V for safe working at the approved voltage of 1,000 V. Reduced blade diameter with integrated protective insulation, low-lying screw and spring elements can be easily reached and operated. Wera's stainless steel tools are vacuum ice tempered and therefore have the hardness and strength properties required for screw connections. Industrial use is possible without restrictions. With "Take it easy" Tool finder: Colour coding by profile and laser-engraved size indication. The hexagon anti-roll protection avoids blades from rolling away unintentionally.

Kraftform Kompakt VDE Stainless

Screw stainless steel together with stainless steel!

Solution to the rust problem: screwdriving stainless steel together with stainless steel! Wera stainless steel tools are manufactured out of stainless steel so unsightly rust can be avoided.

Vacuum ice-hardened

The stainless steel tools from Wera are vacuum ice-hardened and have the hardness and strength needed for screw connections. There are no limitations to the industrial applications they are suitable for.

Individually tested

Our screwdrivers are tested for dielectric strength under a 10,000 volt load to make sure that their most important property, their insulation, has been exhaustively tested. Each individual Wera VDE screwdriver is subjected to this test to guarantee safe working up to 1,000 volts.

Blades for handle

The VDE-insulated Kraftform Kompakt stainless blades are suitable for the 3817 VDE Stainless handle.

Handle/interchangeable blade system – Kraftform Kompakt VDE

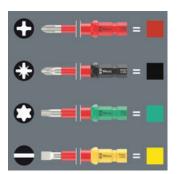

The handle/interchangeable blade system allows rapid exchange of the blades required for a wide range of applications.

Reduced blade diameter for lower-lying screws

Reduced blade diameter with integrated protective insulation, allows sunken screws and spring elements to be accessed and actuated, individually tested as per IEC 60900.

"Take it easy" tool finder

The Kraftform Kompakt VDE blades are equipped with the "Take it easy" Tool finder. The colour coding by profile and the laser-engraved size indication make it easy to identify the required tool quickly.

Hexagonal anti-roll feature against rolling away

The Kraftform Kompakt blades come with an anti-roll protection. The hexagonal shape hinders the blade from rolling away annoyingly at the workplace.
