

13-B 9-Piece Separator Set Ø 22-115 mm/ 350 mm

DESCRIPTION

The 9-piece separator set 13-B is used for extracting ball bearings, roller bearings, inner rings, and other flush-mounted parts in trades, industry, and workshops when there is not enough space for pulling jaws. The separating puller process is capable of initially separating these parts gently before they can be externally extracted. This 9-piece set includes one separator and puller, as well as a pair of extensions, which ensures the full range of applications.

RANGE OF APPLICATION

For pulling off ball bearings, roller bearings, inner rings and other parts that lie flat on the surface

BENEFIT

- Application-oriented compilation for universal use
- By storing them in the box, the completeness of the set can be easily viewed.
- The sharp cutting edges enable pulling where other kinds of pulling are not applicable.
- The highest stability during pulling is ensured by the screw connection of the separator and puller.

MASTER DATA

GTIN [EAN]	4021176060793
Country of origin	DE
Case material	Tool steel
Series	K-13
Net weight [kg]	0,3 kg
Package contents	1 set
Packaging Act	PAP 20
Global sales capability given	Yes (REACH, RoHS, POP, PROP65, TSCA)
