

103-1 Valve spring compressor with clamping range

DESCRIPTION

The valve spring compressors of the 103 series are used for the non-destructive installation and removal of valves for overhead-controlled engines in the automotive industry. The compressors enable safe removal of valves by compressing the valve spring.

RANGE OF APPLICATION

For damage-free installation and removal of valves for head-controlled engines

BENEFIT

- Suitable for both installation and removal
- Safe and gentle work on the engine

OPERATION

- Set the valve spring compressor to the appropriate size; The contact surface is applied to the valve and the clamping device to the valve spring
- Place the contact surface precisely under the valve and tighten the spring by actuating the lever
- Release the tension, hold the valve from below and remove the spring

MASTER DATA

GTIN [EAN]	4021176022876
Country of origin	DE
Case material	Tool steel
Series	103-1
Net weight [kg]	1,21 kg
Package contents	1 piece
Packaging Act	PP 05
Global sales capability given	Yes (REACH, RoHS, POP, PROP65, TSCA)

SPARE PARTS

- 103-101_Replacement pair of claws, straight
