

106-180 Double strong hand vises with wide jaw, hexagon nut, key, max. 40 mm clamping range (total length 180 mm)

DESCRIPTION

The double-strong hand vises with wide jaws, hexagon nut, and key of series 106 are used for clamping workpieces in medium-duty construction work. The inside of the jaws is serrated with a prismatic notch, allowing both round and angular parts to be clamped. The series 106 impresses with its handiness, enabling the workpiece to be turned and flipped during work.

RANGE OF APPLICATION

For clamping workpieces during medium-heavy work in iron construction work

BENEFIT

- Universal applicability in various work situations
- The key allows for quick and secure holding on the workpiece.
- Extremely robust design with flexible joint guidance
- Various versions allow the application depending on the size of the workpiece

OPERATION

- Position hand vises on the workpiece
- Tighten the tensioning key by operating the key and the hexagon nut

MASTER DATA

GTIN [EAN]	4027474528782
Country of origin	DE
Case material	Tool steel
Series	106
Net weight [kg]	2,335 kg
Package contents	1 piece
Packaging Act	PAP 21
Global sales capability given	Yes (REACH, RoHS, POP, PROP65, TSCA)
