

441-600 Pole screw clamp for grounding with mounting hole for ground cable, max. 200 mm clamping range, 100 mm clamping depth

DESCRIPTION

The pole screw clamps of series 441 are used for grounding during welding work. The solid and application-oriented design allows for secure clamping. The series 441 also has a mounting hole for ground cables.

RANGE OF APPLICATION

For earthing during welding work

BENEFIT

- Clamping force up to 5,000 N
- By marking the brackets, you can quickly see the dimensions.
- Smooth-running trapezoidal spindles ensure even higher power transmission

OPERATION

- Place the fixed arm on the workpiece to be held and roughly fix it by shifting the movable arm
- Tighten the spindle and thus firmly fix the workpiece

MASTER DATA

GTIN [EAN]	4027474776367
Country of origin	DE
Case material	Tool steel
Series	441
Net weight [kg]	1,4 kg
Package contents	10 piece
Packaging Act	PAP 21
Global sales capability given	Yes (REACH, RoHS, POP, PROP65, TSCA)
