

550-100 Aluminium vice jaws 100 mm

DESCRIPTION

The aluminium vice jaws can be combined with the series 520, 525, and 530 to make them more durable and robust. The aluminium also allows for the gentle clamping of delicate workpieces.

BENEFIT

- High-quality material and easy assembly
- The vice clamping jaws are the most heavily used part of the vice – protective jaws protect not only the vice but also the clamped workpieces.

MASTER DATA

GTIN [EAN]	4027474610029
Country of origin	DE
Case material	Tool steel
Series	550
Net weight [kg]	0,36 kg
Package contents	5 few
Packaging Act	PP 05
Global sales capability given	Yes (REACH, RoHS, POP, PROP65, TSCA)
