

K-127-A/6 Front-end service set for removing and maintenance of swivel castor arms, ball joints, tie rods & wheel bearings

DETAIL IMAGE

DESCRIPTION

The 6-piece Front-End Service Set is used for disassembly as well as maintenance of swivel castor arms, ball joints, tie rods, and wheel bearings. The set includes a total of five ball joint pullers or extractors in different designs and sizes. The bell-shaped ball joint puller 128-1 is recommended for work where there is plenty of space, whereas the ball joint extractor 129-0, thanks to its leverage, can apply a lot of force even where there is little space. The set K-127-A impresses with its versatility and offers an ideal assortment of essential tools for the automobile industry.

RANGE OF APPLICATION

For the removal and maintenance of swivel castor arms, ball joints, tie rods, and wheel bearings

BENEFIT

- Due to its simple but effective design, the ball joint puller of the series 128 is particularly suitable for quick and uncomplicated use.
- The bolt on the ball joint extractor of series 219 can be adjusted to flexibly adapt the clamping range
- The ball joint pullers of series 127-A are equipped with a hook eye for attaching fall protection
