

W-132-M Brake bleeding hose

DESCRIPTION

The brake bleeding hose of the W-132-M series prevents air from entering during the brake fluid change when working in industry and workshop. The valve significantly simplifies work on relevant parts.

RANGE OF APPLICATION

To prevent air ingress when changing brake fluid during industrial and workshop operations.

BENEFIT

- Also suitable for the bleeding of hydraulically operated clutches

MASTER DATA

GTIN [EAN]	4048984895430
Country of origin	TW
Case material	Tool steel
Series	W-132-M
Net weight [kg]	0,4 kg
Package contents	1 piece
Packaging Act	PAP 20
Global sales capability given	Yes (REACH, RoHS, POP, PROP65, TSCA)
