

W-3132/K2 Rivet machine with lever and punch and rivet remover complete on hardwood board

DESCRIPTION

The riveting machine of the W-3132 series is suitable for all riveting tasks, especially for brake and clutch linings, etc., and even for complicated jaws with longitudinal and height ribs. It is a manual tool for riveting and de-riveting with a long lever for energy-saving operation. Riveting is done from the bottom, and de-riveting from the top.

RANGE OF APPLICATION

Suitable for all riveting tasks, especially for brake and clutch linings, etc., and even for complicated jaws with longitudinal and height ribs.

BENEFIT

- Simple and practical in handling
- The riveting machine can be clamped in the vice or mounted on the wall using screws
- The shape of the rivet inserts allows the use of solid and hollow rivets.
- Due to the advantageous leverage ratios, even with full rivets, only a slight pressure is required
- The rivet inserts are replaceable by loosening two knurled screws

OPERATION

- Insert rivets
- Place linings between the punches
- Press down hand lever to rivet

MASTER DATA

GTIN [EAN]	4048984555662
Country of origin	DE
Case material	Tool steel
Series	W-3132/K2
Net weight [kg]	9,395 kg
Package contents	1 piece
Packaging Act	PAP 20
Global sales capability given	Yes (REACH, RoHS, POP, PROP65, TSCA)
