

YHU-S Mobile hydraulic transmission jack "RHINO" with 1.5 t max. tension force

DESCRIPTION

The hydraulic transmission jack RHINO is used for work on car and truck transmissions, clutches, and differentials. The swiveling base plate with adjustable mounts and chains is used for aligning the mounts and Universal tool-mounting attachment up to 1.5 t.

RANGE OF APPLICATION

For work on car and truck transmissions, clutches, and differentials.

BENEFIT

- The lever actuation is swiveling by 360° degrees, as well as removable, and allows ergonomic operability from the working area.
- The overload protection and the hydraulic lowering function for controlled load lowering reduce the risk of injuries or damage
- With four swivel castors, the RHINO can be easily used anywhere at any time.
- The flat design allows for working on low-lying vehicles

MASTER DATA

GTIN [EAN]	4021176060113
Country of origin	DE
Case material	Tool steel
Series	YHU
Net weight [kg]	146 kg
Package contents	1 piece
Packaging Act	PAP 21
Global sales capability given	Yes (REACH, RoHS, POP, PROP65, TSCA)
