

Stepped jaws set, 3 pieces, angled serration, for chuck type: 250

Order data

Order number	313235 250
GTIN	2050001929396
Item class	33T

Description

Application:

As the jaws can be changed or adjusted to the required diameter **in just a few seconds**, it is useful to have several jaw sets on hand ready for use at the machine. **This minimises set-up times.** The jaw units consist for example of several sets of base jaws with soft top jaws, which can be machined out to the required diameters. This rationalisation method is not only necessary for NC machines but also important for every lathe type.

For turning or drilling.

Suitable for:

Schunk self-centring chucks No. 313115; 313117; 313135; 313137, Röhms self-centring chucks Duro No. 313120; 313140 and other self-centring chuck systems.

Note:

- **Hard top and stepped jaws purchased subsequently must be ground internally in the chuck for concentricity and run-out.**
- **Please check the serrations when matching to lathe chucks.**

Technical description

for chuck type	250 mm
Version	2-step
Length L	114 mm
Width B	26 mm
Height H	70 mm

suitable for colour code	Schunk self-centring chucks and jaws
suitable for colour code	Röhm self-centring chucks and jaws
Type of product	Self-centring chuck jaws
