**Description****Version:**

**Worktop depth 750 mm, thickness 50 mm:** With holes on the underside of the worktop for attachment of drawer units and support legs (individual Vario components).

Worktop for **assembly, inspection, and laboratory** work. The surface consists of a medium-hard covering that is permanently anti-static and highly wear-resistant, 2 mm thick. A central strip wood core and a matching bottom face covering ensure a non-warping worktop. The end faces are provided with a pale grey ABS edge strip, 3 mm thick. Eluplan worktops are largely resistant to oil, grease, weak acids, and alkalis. (These do, however, affect the appearance of the surface).

**Note:**

The Eluplan plastic coating is **not colour-fast**. No complaints will be accepted for changes in colour due to exposure to sun and light.

**Technical description**
