# Garant

Solid carbide drill plain shank DIN 6535 HA 180°, TiAIN, Ø DC m7: 4,7mm

## Order data

| Order number | 122793 4,7    |
|--------------|---------------|
| GTIN         | 4045197744760 |
| Item class   | 11E           |

## Description

### Version:

Special point geometry for generating **180° flat-bottomed holes.** Low radial forces even when spot drilling on faces with up to 15° slope. Flute geometry for optimum chip evacuation. With 4 guide chamfers to stabilise the drill in the hole.

### Advantage:

**The 180° point angle** permits drilling and counterboring in a single operation. **Recommendation:** 

When using the solid carbide 180° drill it is absolutely essential for process reliability:

- When spot drilling on flat surfaces to drill a pilot hole 1×D using pilot drill No. 122736.
- When spot drilling on sloping surfaces up to max. 15°: reduce the feed rate f to 25% of
- the stated value. After spot drilling, the normal feed rate value can be used.

### Note:

Flute length  $L_c = L_2 + 1.5 \times D_c$ .

Form HB and HE supplied at the same price as HA.

#### Form **HB:** order with **No. 122793 + 129100HB**.

#### Form **HE:** order with **No. 122793 + 129100HE**.

180° solid carbide drills for machining aluminium available on request.

Not suitable for generating counterbores for socket-head screws to DIN974-1.

## **Technical description**

| Standard                    | Manufacturer's standard |
