

# Revolving centering taper, truncated cone, very large Ø / Morse taper: 60/2

### **Order data**

Order number	323000 60/2
GTIN	4045197774729
Item class	31Z

### **Description**

#### **Version:**

- · Centering taper with truncated cone.
- · Particularly sturdy design with oversize bearings.
- The bearings have a special lubricant and require no maintenance.
- The centering taper and tapered arbor are made of high quality material, through hardened and finish ground.

#### **Description:**

Lathe centres are mainly used on lathes to support long and slim workpieces, since with these workpieces there would otherwise be a risk of the workpiece bending or moving around as a result of the forces generated.

The lathe centre is secured with a Morse taper. The workpiece is clamped in the chuck and a counterbore is added using a centre drill. After re-clamping, the lathe centre is then inserted.

## **Application:**

For machining **hollow parts, tubes** etc. Particularly suitable for heavy machining where at the same time high accuracy is required.

# **Technical description**

maximum radial run-out	0.005 mm
maximum speed	4000 min <sup>-1</sup>
smallest Ø	20 mm
Morse taper	2

for workpiece weight at D	200 kg
for workpiece weight at D1	140 kg
Taper angle a	60 degrees
Head length L	73 mm
Type of product	Centring drill
