| Order number | 319164 32 |
| GTIN | 4251414900424 |
| Item class | 38T |

Description

Version:

The first successful introduction of a tool mounting design which can be used on both disc turrets and radial turrets. Irrespective of the alignment method in use. Modular system configuration.

Advantage:

- **All tools with direct internal coolant supply connection.**
- **Cost reduction via efficient stock-holding of bearings.**
- **Higher productivity due to improved positioning.**

Note:

Suitable for vibration-damped boring bars No. 264902 – 264908, No. 264910 – 264922 or tools with plain shank (such as: solid carbide boring bars Ø 10 mm).
Length L: 128 mm
