

Safety helmet BOP ENERGY 3000, Colour: YELLOW

Order data

Order number	097807 YELLOW
GTIN	4017765057398
Item class	09K

Description

Version:

High-quality thermoplastic helmet of glass fibre-reinforced polystyrene, for use when working on live equipment or in the vicinity of live equipment **up to 1,000 V AC** (or 1,500 V DC). Even at high temperatures the helmet keeps its shape and offers protection against electric arcs. Protection against splashes of liquid metal (MM), and against side deformation (LD). Resistant to low temperatures down to -30 °C and to high temperatures up to 150 °C.

- **6-point strap attachment, height adjustable**
- **Without mounting**
- **Natural leather sweatband**
- **Straight form**
- **With rotary catch**

Application:

Energy suppliers, heavy current users, railway companies, hot operations, chemical industry, electrical work.

Standard:

DIN EN 397; DIN EN 50365

Specification:

Protection against splashes of liquid metal (MM), and against side deformation (LD). Resistant to low temperatures down to -30 °C and high temperature up to + 150 °C.

Suitable for:

ArcShield clear visor No. 097836 attached by MFA multi-function adapters No. 097831.

Helmet characteristics: Protection against lateral deformation

Material of helmet shell: UP-GF glass fibre-polyester

Lens coating: resistant to chemicals
 Width adjustment: Drejelukning
 Size: 53 - 61 cm
 Weight: 475 g

Technical description

Width adjustment	Drejelukning
Weight	475 g
Lens coating	resistant to chemicals
Size	53 - 61 cm
Helmet characteristics	Electrical insulation
Helmet characteristics	Safety characteristics up to 150 °C
Helmet characteristics	Safety characteristics down to -30 °C
Helmet characteristics	Protection against liquid metal spraying out
Helmet characteristics	Protection against lateral deformation
Material of helmet shell	UP-GF glass fibre-polyester
Standard	DIN EN 50365
Standard	DIN EN 397
Type of product	Safety helmet
