

**Bump cap HardCap Aerolite[®], navy, Type: MICRO****Order data**

Order number	097841 MICRO
GTIN	5038428222600
Item class	09W

Description**Version:**

The **baseball style** Aerolite[®] HardCap bump cap is made of a **lightweight material** (expanded polypropylene) in conjunction with a sturdy HDPE shell. The water-repellent cap has a **ventilation mesh** at the side, which ensures very good breathability. In addition the cap has **reflective strips at the side**, which provide additional visibility. The cap has an **integral sweatband** for additional comfort. Both the sweatband and also the backing material are coated with Polygiene[®], prevents the formation of unpleasant odours. Above all the cap offers an impressively **low weight** of less than 135g, without compromising the performance and safety. The resilient adjustment tape sits lower than for other caps, which guarantees better seating.

Standard:

EN 812

Note:

On request, the bump caps can be customised with your logo!
