GTIN	4045197355331		
Item class	11E		

Description

Version:

Spiral fluted, with **4 guide chamfers** and internal cooling channels. New generation of high performance deep hole drills in the HPC range.

With 135° point angle and special h7 cutting edge tolerance for optimum generation of a deep hole.

High roundness and alignment accuracy of the deep hole.

Note:

Flute length $L_c = L_2 + 1.5 \times D_c$.

For process reliability when using the $16\times D$ deep hole drill, an initial centre drilling with No. 121068 - 121121 or $4\times D$ pilot drilling operation with pilot drill No. 122736 is necessary. For deep holes greater than $20\times D$, a pilot hole to the maximum drilling depth with pilot drill No. 122736 is absolutely essential. **The generation of a pilot hole improves process reliability.** See also pages 140/141.
