Description

Version:
Spiral fluted, with **4 guide chamfers** and internal cooling channels. New generation of high performance deep hole drills in the HPC range.
With 135° point angle and special **h7 cutting edge tolerance** for optimum generation of a deep hole.
High roundness and alignment accuracy of the deep hole.
Note:
Flute length $L_C = L_2 + 1.5 \times D_C$.
For process reliability when using the 16×D deep hole drill, an initial centre drilling with No. 121068 – 121130 or 4×D pilot drilling operation with pilot drill No. 122736 is necessary. For deep holes greater than 20×D, a pilot hole to the maximum drilling depth with pilot drill No. 122736 is absolutely essential. **The generation of a pilot hole improves process reliability.** See also pages 129/130.
