## Description

#### Version:

Helical fluted, with **4 guide chamfers** and internal coolant holes. New generation of high performance co-pilot drills in the HPC range. **With 138° point angle** and special **j6 cutting edge tolerance** for optimum generation of a co-pilot hole. **High roundness and alignment accuracy of the co-pilot hole.** 

#### Note:

Flute length  $L_c = L_2 + 1.5 \times D_c$ .

To achieve good process reliability with 40×D and 50×D deep hole drills, it is absolutely essential to drill a pilot hole to the maximum drilling depth with a pilot drill No. 122736 and a 20×D co-pilot hole with a co-pilot drill No. 123691.

The generation of a pilot hole improves process reliability. See also pages 140/141.
