Description

Version:

Precision solid carbide side milling cutters in the HPC machining range. **With new high-performance coating** for very long tool life.

Use as a set: Cutters with the same \emptyset and same number of teeth can be combined as a set and adjusted to the required width. Since the cutters have no raised bore collar, the staggered teeth mesh with each other.

2-piece sets are particularly economical. By reversing the side milling cutters, both side edges of each cutter can be used.

Noto:

- Do not clamp the cutters in a set without a sufficiently thick arbor spacer ring, otherwise the cutters will be damaged.
- See Product Group 30 for suitable arbor spacer rings.
- · Slots milled from solid: f_z for $a_e = 0.1 \times D$.

Successor product to No. 185010.
