

**Xpert 3047 Universal keyhole jigsaw 300 mm, Type: IRW****Order data**

Order number	581571 IRW
GTIN	
Item class	58Z

Description**Version:**

This universal jigsaw from Irwin is suitable for cutting holes in panels, but is also very useful in hard-to-reach places. It can be used to cut chipboard, plasterboard, panels, beams and all types of wood. The ergonomic handle is designed for added comfort, but remains robust and durable. The saw blade made of high-quality steel has a sharp cutting edge, which makes cutting much easier.

- **Saw blade type: Special fine tooththing (hardpoint universal tooththing)**
- **Length: 300 mm (12 inches)**
- **Teeth: 7 tpi**
- **Ergonomic handle for comfort, yet still robust and durable**
- **Pistol grip**
- **Saw blade made of high-quality steel**
