Description

Version:
Precision solid carbide side milling cutters in the HPC machining range.
Use as a set: Cutters with the same ∅ and same number of teeth can be combined as a set and adjusted to the required width. Since the cutters have no raised bore collar, the staggered teeth mesh with each other.
2-piece sets are particularly economical. By reversing the side milling cutters, both side edges of each cutter can be used.
Note:
· **Do not clamp the cutters in a set without a sufficiently thick arbor spacer ring, otherwise the cutters will be damaged.**
· **See Group 30 for suitable arbor spacer rings.**
· **Slots milled from solid: f_z for $a_e = 0.1 \times D$.**
