### Description

#### Version:

**3-cutter tool,** specially developed for use at **very high feed rates** in aluminium. Outstandingly suitable for machines with **high power consumption** and stable machining conditions.

- Specially developed cutter geometry, designed for very high feed rates, reduced cutting pressure and controlled chip breaking.
- · Precision flute profile for reliable evacuation of chips.
- $\cdot$  Achieve outstanding feed rates and tool life thanks to the third cutting edge.

The sector-leading technology of the drill point for the tool guarantees optimum self-centring behaviour and permits spot drilling on irregular surfaces. 3 guidance lands guarantee a stable exit from the hole and an exact roundness of the hole.

**With DLC coating** – for longer tool lives, especially with aluminium with a higher Si content. Coating on order – no return. Delivery time approx. 3 weeks if the basic item is available ex stock. Please note the minimum order quantity.

#### Note:

Flute length  $L_c = L_2 + 1.5 \times D_c$ .
