

Orthopedic insole, Type: 2

Order data

Order number	092816 2
GTIN	
Item class	09N

Description

Version:

Easily order orthopaedic insoles online.

Each orthopaedic insole is individually configured for your feet by orthopaedic shoemakers with the right elements to provide support, padding & cushioning, and is custom-made for your feet. In addition, the orthopaedic insoles are adapted to your shoes and, thus, the necessary precautions for ESD conformity are ensured.

Why custom orthopaedic insoles?

Do you have foot, knee, back, or neck pain? This can come from your feet: up to 70% of adults have a faulty foot posture, which puts their entire body out of balance and can cause pain and injuries. This is especially the case when you stand a lot, because under strain, a load of 3 to 5 times your body weight acts on your joints. Orthopaedic insoles, like the ones made by GetSteps, are considered to be the most effective medical aid against faulty foot posture and have been proven to reduce pain and injuries, and prevent these.

And the best thing: everything is Made in Germany, by experienced orthopaedic shoemaker specialists. Receive orthopaedic insoles for work/safety shoes with the existing foot impressions.
