GTIN	051131279414
Item class	04M

Description

Version:

The **E-A-R™ Flexible Fit HA** earplugs are made of patented foam, which allows the earplugs to be **washable and re-usable** for up to two weeks. **No pre-forming required:** Since the foam tip does not have to be pre-formed, the earplug remains clean, even when used with dirty hands or gloves. The material and the design also permit **quick insertion into the ear canal, even with one hand**. Especially good for activities where hands become dirty and for situations where only one hand is free to insert the earplugs.

Supplied with:

E-A-R™ Flexible Fit HA earplugs without cord, 100 pairs, individually packed.

Note:

The SNR value (noise attenuation) results from the following:

Insertion with one hand test results: 30 dB

Insertion with both hands test results: 35 dB

Material of earplugs: TPE
