

Yale

UNO plus A lever hoist with round steel link chain, Safe working load: 3t

Order data

Order number	086017 3
GTIN	4025092168366
Item class	08Y

Description

Version:

Robust construction made of sheet steel in compact design. Smooth-running **chain release**. Chain guides for trouble-free chain running.

Application:

Standard, handy all-purpose hoist for versatile applications.

Note:

The principle of the **threaded load pressure brake** is that the axial braking force is generated by the load itself and is thus proportional to the weight of the load. The load is safely held in all positions; to lower it, the difference between the braking torque and load torque must be overcome. All Yale all-purpose hoists are equipped with this device.

The automatic **chain release** permits **quick run-out** of the unloaded chain; when the load is applied, the **threaded load pressure brake** automatically takes effect again and the load is safely held.

The **slip clutch** (optional feature) prevents unduly high loading, and thus increases the working life of the lifting gear.

ATEX version on request

Technical description

Lifting force at nominal load	40 daN
Safe working load in t	3 t
Safe working load	3000 kg
Housing material	Sheet steel
Chain release.	yes
Standard lifting height	1.5 m
Number of chains	1
Weight	16.9 kg
Type of product	Lever hoist / chain pull
