Description

Version:
With DLC coating – for longer tool lives, especially with aluminium with a higher Si content.
Coating on order – no return. Delivery time approx. 3 weeks if the basic item is available ex stock. **Please note the minimum order quantity.**
3-cutter tool, specially developed for use at **very high feed rates** in aluminium. Outstandingly suitable for machines with **high power consumption** and stable machining conditions.
· **Specially developed cutter geometry, designed for very high feed rates, reduced cutting pressure and controlled chip breaking.**
· **Precision flute profile for reliable evacuation of chips.**
· **Achieve outstanding feed rates and tool life thanks to the third cutting edge.**
The sector-leading technology of the drill point for the tool guarantees optimum self-centring behaviour and permits spot drilling on irregular surfaces. 3 guide chamfers guarantee a stable exit from the hole and an exact roundness of the hole.
Note:
Flute length $L_c = L_2 + 1.5 \times D_c$.
HB shanks are available at the same price as HA.
