

Dino-Lite
 Digital Microscope

USB hand-held microscope, Manufacturer's designation: WF7915MZTL

Order data

Order number	492032 WF7915MZTL
GTIN	4711203830573
Item class	49K

Description
Version:

Easy-to-use portable digital microscope for professional use in various disciplines. Thanks to the CMOS chip and WiFi/USB 2.0 connectivity, it can be easily connected to any device and offers outstanding image quality and up to 220x magnification. Polarisers reduce reflections on shiny objects and improve contrast. The magnification depends on the desired field of view. The smaller the field of view, the higher the potential magnification. Models with a long working distance can be used if you need a greater distance to the object. Includes intuitive measurement software for Windows and MacOS. The best choice for the demanding professional in a wired and wireless format with excellent image quality and colour reproduction. Also available as a model with a large working distance.

Supplied with:

Measurement software DinoCapture 2.0 (Windows) and DinoXcope (Mac OS).

Optional extras:

Pillar stand No. 492035

Note:

Other versions (e.g. with coaxial incident light, ESD protection, etc.) and system calibration service available on request.

Technical description

Camera	5.0 megapixel CMOS colour camera
Automatic magnification reading (AMR)	yes
Extended dynamic range (EDR)	yes

Polarisation filter	Yes
Magnification (x-times)	10 – 140
Extended depth sharpness (EDOF)	yes
Interface	USB interface
Interface	Wireless connection
Large working distance possible	yes
Type of product	Video hand-held microscope
