| Item class | 23J |

Description

Version:

Vee ground drilling head for precise positioning and stable seating. Angled, **radial stop surfaces** for a significant increase in clamping force due to the cutting forces acting during machining. For productive drilling with **high feed rates.**

ICP-2M

Main area of application **ISO P**. Higher accuracy and better surface quality due to **4 guide chamfers**. Optimum roundness of the bore, low axial forces, increased stability, increased metal removal rate.

Note:

Cutting data applies for the base body 5×D. Drill pilot holes exclusively with drilling head of the same type – in particular for drilling heads FCP and QCP-2M. Please observe the application instructions for the base body. Cutting tolerance of the inserts: **k7** (positive toleranced cutting edge diameter).

Designation convention: [type] [Ø D_c]-[addition] [cutting material]

Examples:

No. 231740 6.5 ICP 065 IC908

No. 231742 18.5 ICP 185-2M IC908

No. 231745 18.5 HCP 185-IQ IC908 The minimum order quantity corresponds to one pack unit quantity (VPE) or a multiple thereof.
