| GTIN | 4025092155496 |
| Item class | 08Y |

Description

Version:

For connecting and disconnecting hydraulic cylinders and other components. The clamping nut requires only to be hand-tight, because the connection is self-sealing. In the disconnected condition the inner balls seal the openings, so that no oil can escape. The coupling sleeve is provided with a rubber dust-seal cap. **Coupling sleeves are always supplied with hydraulic cylinders.**

All components and attachments satisfy **metric standard ranges**, which considerably simplifies assembly, service, and the procurement of spare parts. **100 % compatibility** with all commercially-available 700 bar hydraulic systems.

Note:

Closed systems are pre-mounted ex works, filled and air bled.

Hydraulic hoses (No. 086080 and 086081) are supplied with coupling plugs.
